Title: The Pharmacy Postage Stamp of 1972 Honoring America's Pharmacy Professionals:
The Fiftieth Anniversary of the First Day of Issue - November 10, 1972 [512 pages]

Westminster, CO, February 4, 2022 -- The U. S. postage stamp honoring America's Pharmacy profession was issued 50 years ago on November 10, 1972. It took nearly two generations of work to accomplish this feat, beginning in 1934. "Every calling, trade, art, profession, has a history. The influence of the past upon the present is in direct proportion to the wealth of tradition and of history that has been handed down through successive generations. Progress is frequently measured in terms of respect for those who have preceded us and who have left us landmarks to guide our way."

This new book is a reference work telling the story of the long road to a postage stamp honoring America's Pharmacists, "Partners In Health." It indexes the artwork used to create a working model of the stamp, plus dies, rolls, proofs and plates, by the Bureau of Engraving and Printing. This volume also collects as many of the First Day of Issue cacheted covers as possible together in one place. (An effort taking decades!) It also outlines the cachet production process from sketched essays to final artwork through production of the printing plates. Please contact the author with feedback and suggestions. New image scans for missing items are very welcome! The Book series is intended for educational use only and to assist future researchers. I hope that you enjoy this look back at the long effort to honor America's pharmacy professionals with a commemorative postage stamp of their own! Just search Amazon.com for the title or my name to find them. The first versions released are:

The **Standard Color Edition**, softcover version with 512 matte finish pages for only \$64.99!
